Gravo-Tac Indoor

1220 x 610 x 0.8mm and 1.6mm

Description:

- * Suitable for Rotary engraving
- * Used for Braille and Tactile designs
- * The design of GravoTac provides the core (substrate) and cap (profile) layers separately. By outlining the desired images or text in the adhesive backed profile layer, and peeling away the excess material, Gravo-Tac creates raised-letter signage compliant with raised letter regulations. The raised letter process is also a great way to create multi-coloured signage with your engraving machine.
- * Available with or without adhesive.
